

ANDERSON POTS™

Long Term Value & Innovative Design

Anderson Die & Manufacturing
2425 SE Moores Street, Portland, OR 97222

Anderson Pots—the nursery industry standard.

ANDERSON POTS

Our premium nursery pots range in size from our tiny 2 1/2" round pots to various 6" and 7 1/2" designs, up to our very large 12 1/2" round, 9 1/2" high design.

Anderson Square Pots range from 2" square to the popular 4 1/8" square size. Both Bottom Drainage and Side Drainage pots are available. Green is our normal pot color with additional colors available, but not always in stock for immediate delivery.

Cover photograph courtesy of Iseli Nursery Inc, plant photos courtesy of JLPN inc, Brooks Tree Farm, Iron Gardens inc and Iseli Nursery.

ANDERSON SAUCERS

Our premium saucers are unequalled in quality and longevity. If you want saucers that will last, these are definitely the ones. Standard saucers range from 4" diameter to the 25" super saucer and come in various colors.

Look for the Anderson Die & Manufacturing name prominently displayed on the bottoms of plastic pots where quality plants are sold.

ANDERSON BANDS

We offer a variety of polypropylene bands in various sizes for perennials, bedding plants, trees and other uses. Our built-in stacking ribs inhibit root swirling and the square band design promotes root growth better than traditional round pots. Bands provide more soil than round pots in an equivalent space. Anderson Deep Tree Bands and our Perennial/Bedding Plant Bands feature our famous Cross-Bottom. Don't accept anything less. All our Bands are reusable year after year.

ANDERSON POLYCANs

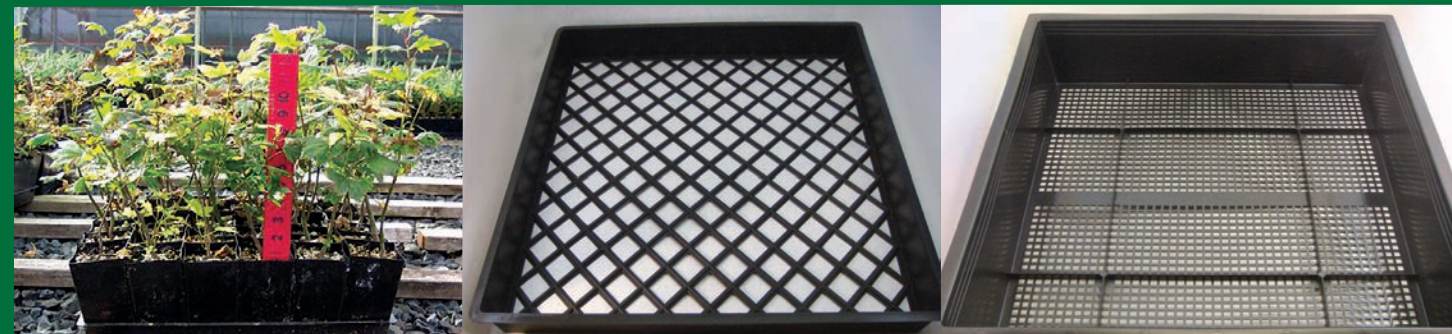

Our fifteen standard size Polycans range from the half liter "Little Polycan" and two quart "Welsh Pot" to the large, nearly 20 gallon, Polycan No. 20. If you need Polycans without holes, or with non-standard holes, let us know. Our thick Polycan high density polyethylene walls protect against sun penetration that damages plant roots and thick walled pots last longer and resist cold better than thinner-walled pot designs.

Our quality offers your nursery outstanding long term value.

ANDERSON FLATS

We build long lasting nursery flats in several different styles. The new 17" Square Divider Flat is specifically designed to hold sixteen 4" Anderson bands or eight Anderson bands in an every-other-slot arrangement for very bushy plants.

We believe quality plants deserve Anderson Pots

Anderson Die & Manufacturing designs and manufactures quality, reusable nursery containers and allied products for the wholesale nursery trade. Our products are available from nursery supply companies and in garden centers throughout North America. Quality produced in Portland, Oregon since 1965, Anderson Pots are the nursery industry standard. Everything we sell, we make in Oregon in our 60,000 square foot plant featuring some of today's finest state-of-the-art plastic injection molding machines. We are situated on 9 acres just off US Highway 99E (McLoughlin Boulevard) in Portland.

Contact us today for a current price list. You may also wish to request a confidential credit application for open account purchases.

WHY ANDERSON POTS?

While some choose Anderson Pots for their long term value compared to thin-walled plastic throwaways, there are many other reasons Anderson Pots are so highly prized.

In addition to being a quality, reusable investment that can be justified economically in terms of long term value, our polyethylene and polypropylene pots' innovative designs offer growers:

- High survival rates
- Excellent root development
- Stacking ribs to inhibit root circling
- Improved root protection from the sun's rays
- Improved root protection from cold temperatures
- Water saving drainage designs
- Ease of handling in potting and grafting
- Wide, stable bases to resist tipping
- Volume discounts for higher volume users

- Custom designs to meet individual company needs
- Fast delivery from our large inventory of popular sizes

We strive to always offer competitive prices on top quality injection-molded plastic nursery products; prices that are truly bargains for what you get. But, we will never be the cheapest container supplier for nurseries who look for initial cost over quality and service. If you are looking for the cheapest initial price on a pot, you should probably look elsewhere.

On the other hand, if service and long term value drive your decision making, Anderson Pots may be exactly what you seek. Our customers tell us our pots last and last. It is not uncommon to find Anderson Pots more than a decade old still in use in American Nurseries. We offer outstanding long term value in an age of short-cuts and throw-aways.
